

Automotive Hydraulic Cylinders

Model: ZAR Series
Stroke: 3" to 10"
Capacity: 2-10 tons
Max. Operating Pressure: 8,950 psi

For Collision Repair, please order our snap-together components (shown above) for quick set-up for any jobs.
(CAUTION: For each attachment or component used in the set-up, the rated capacity of the hydraulic system is reduced 50%)

Threaded rod end.

Snap-type rod end.

Usage

These rugged versatile cylinders are designed for automotive collision repair, and a broad range of tasks that require hydraulic force.

Special Features

1. All models come with either 1/4" NPT or 3/8" NPT regular flow quick-connection couplers and dust caps.
2. 10 ton models are designed with internal threads, or snap type on rod end, which can be easily converted for threaded or snap-type applications. Matching base is available upon request.
3. 4 ton models come with a snap-type inner base.
4. The 2 ton model comes with flat-type base and screw extension top.

1/4 N.P.T. regular coupler

1/4 N.P.T. L-type coupler

3/8 N.P.T. regular coupler
