

# Air Hydraulic Truck Jack

Model: ZATJ-22S-4v2  
Capacity: 22 Ton

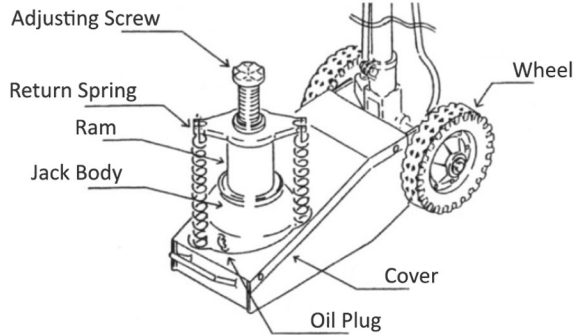

**ZATJ-22S-4v2**

## Usage:

This compact, heavy-duty hydraulic jack is designed for use on trucks, buses and agricultural machinery.

## Special Features:

1. Lightweight and built for heavy-duty use.
2. All-steel welded construction makes our ZATJ reliable, long lasting and leak free.
3. The built-in safety valve prevents use beyond the rated capacity and lifting limit.
4. Air pump allows fast quiet operation.
5. An extension screw for fine adjustment is included. Extension adapters are also available separately.
6. When connected to standard shop air pressure providing 90-140 psi, these jacks can quickly obtain rated lift capacity with air-actuated operation.
7. The two large rubber-tire wheels and 3 position locking T-handle make these jacks easy to fit in many lifting situations.

• 3 Position Locking T-handle

• Optional Extension Adapters For Extra Height

4" 2-3/8" 1/2" 1/2"

• Large Rubber Tires
